Academic Achievement Assessment: Wechsler Individual Achievement Test – Third Edition (WIAT-III)

Overview
The Wechsler Individual Achievement Test – Third Edition (WIAT-III; Wechsler, 2009) is a nationally standardized, comprehensive, individually administered test for assessing the achievement of children, adolescents, college students, and adults ages 4 through 50. The WIAT-III retained the basic content domains of the WIAT-II (i.e., listening, speaking, reading, writing, and mathematics) but made improvements to make administration easier and shorten the administration time. Another goal of the revision was to increase consistency with the Individuals with Disabilities Education Improvement Act of 2004 (IDEA). The WIAT-III can be used to comprehensively assess a broad range of academic skills or to test only in the area of need. Scores are provided as age- or grade-based standard scores, percentiles, grade and age equivalencies and stanines.
